OR Safety

Our comprehensive surgical solutions offer you a complete surgical range that meets very high standards. For all of our products – Raucodrape OR drapes, Sentinex OR clothing, Setpack OR dressing material sets or Kitpack OR custom procedure trays made up individually for you: Quality and functionality are the focus of our products, which is how we guarantee greater reliability and efficiency in your OR.

Protection and safety

Prevention of intra- and postoperative infections during surgery is the top priority. This means that products and materials used during surgery must meet stringent requirements. Patients and staff can only be reliably protected if all pathogen transmission routes are cut off to the extent possible. OR products from L&R play an essential role in helping to do this.

The sterile Raucodrape OR drape system by L&R meets and in many cases exceeds the requirements stipulated by the European EN 13795 series of standards. These standards define the basic requirements for OR drapes and gowns. The standards specify minimum values for resistance against fluid and pathogen penetration, among other requirements. In addition to the European Standard EN 13795, a large part of the range complies with the AAMI standard of the American National Standards Institute (ANSI). Raucodrape provides a complete barrier against infection and is an important part of effective infection prophylaxis in the OR. Together with Sentinex OR clothing, Kitpack OR custom procedure trays and Setpack OR dressing materials, L&R provides a full range of products for all surgical procedures.

Cost-effectiveness and expertise

Our medical device consultants, who have many years of practical experience, analyse your work flows and processes together with you and develop tailored, cost effective solutions.

Monitoring and quality

All our products are precisely adjusted to the customer's particular requirements in terms of material and function and are subject to ongoing stringent quality inspections. We place great value on safety standards which, in some cases, even exceed the legal requirements.

OR Drape System

Raucodrape®
Safety and comfort for the OR team and for patients

Raucodrape®

- offers a large range of sets and individual products
- optimises workflows in the OR, reduces procedure costs
- Natural rubber latex is not an ingredient in the production of Raucodrape OR Drapes.*
- The special combination of layers of absorbent PP** nonwoven fabric and impermeable PE** film ensures that the entire drape is absorbent and impermeable to fluids, thus creating a secure barrier against fluids and bacteria.

L&R offers a wide range of different materials and uses the following names for the range of OR drapes:

Raucodrape® PRO

- 2-layered (without reinforcement)
- 2-layered Plus (with reinforcement)
- 3-layered (without reinforcement)
- 3-layered Plus (with reinforcement)
- Single-layered (film: transparent or opaque)

Raucodrape® SMART

- 2-layered (without reinforcement)
- 2-layered Plus (with reinforcement)
- Single-layered (film: transparent or opaque)

Raucodrape® Drape Sheets

- 2-layered (without reinforcement)
- Single-layered (fluid-repellent nonwoven material)

* However, to the best of our knowledge we can't completely exclude any potential contaminations with latex traces from the production or the environment.
** PE: polyethylene, PP: polypropylene

Raucodrape® PRO OR Drape System

PRO – maximum protection for longer, more complicated procedures
- wide range of products
- premium, generous design with very high user comfort
- exceeds EN 13795 requirements
- a large part of the range fulfills the AAMI Standard

Raucodrape PRO OR Drape 2-layered
- for procedures with low to moderate amounts of fluid
- safe barrier effect against penetration by fluids and bacteria
- fully absorbent and impermeable to fluids
- high tensile strength
- very low linting

PP* nonwoven

PE* film

Raucodrape® PRO
2-layered
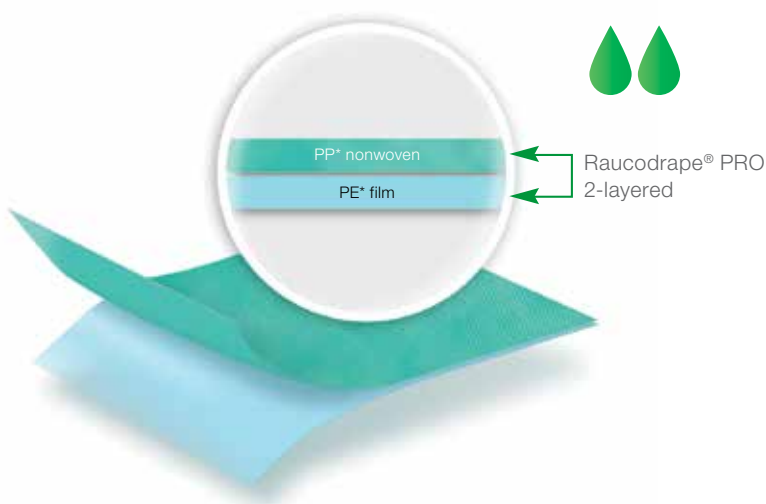

Raucodrape PRO OR Drape 2-layered Plus
- a plus for procedures with very high amounts of fluid
- safe barrier effect against penetration by fluids and bacteria
- very good absorbency and rate of absorption
- high tensile strength
- very low linting

Raucodrape® PRO
2-layered Plus

PP* nonwoven

PP* nonwoven

PE* film
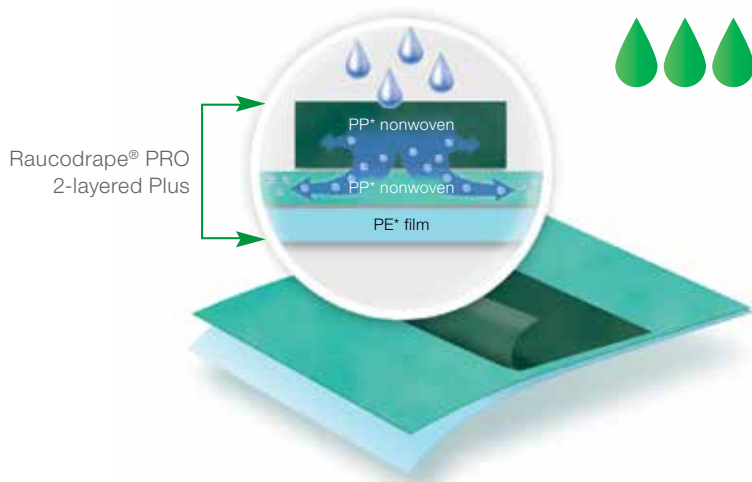

* PE: polyethylene, PP: polypropylene

Raucodrape PRO OR Drape 3-layered

- the 3-layered OR Drape offers more comfort for the patient due to the additional nonwoven layer
- for procedures with moderate to high amounts of fluid
- safe barrier effect against penetration by fluids and bacteria
- fully absorbent and impermeable to fluids
- high tensile strength
- very low linting

Raucodrape® PRO
3-layered

PP* nonwoven
PE* film
PP* nonwoven
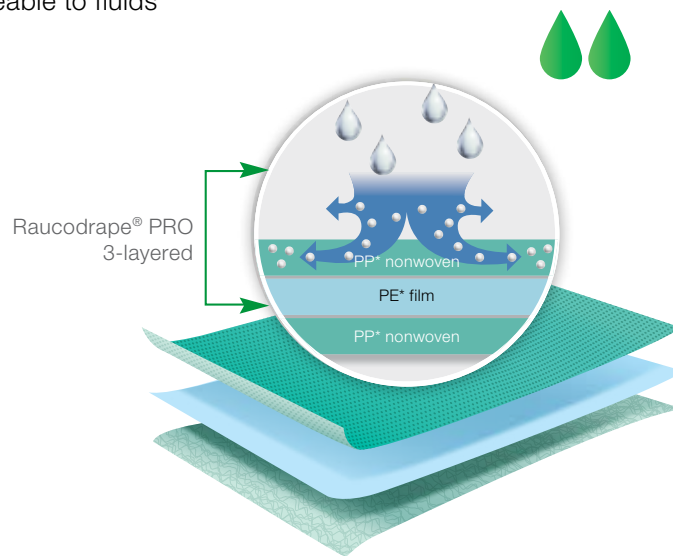

Raucodrape PRO OR Drape 3-layered Plus

- the 3-layered OR Drape offers more comfort for the patient due to the additional nonwoven layer
- a plus for precedures with very high amounts of fluid
- safe barrier effect against penetration by fluids and bacteria
- very good absorbency and rate of absorption
- high tensile strength
- very low linting

Raucodrape® PRO
3-layered Plus

Raucodrape® SMART OR Drape System

SMART – protection for shorter, less complicated procedures
- focused range of products
- functional design, very user-friendly
- meets the requirements of EN 13795 and the AAMI standard

Raucodrape SMART OR Drape 2-layered
- for procedures with small amounts of fluid
- safe barrier effect against penetration by fluids and bacteria
- fully absorbent and impermeable to fluids
- high tensile strength
- very low linting

PP* nonwoven
PE* film
Raucodrape® SMART 2-layered
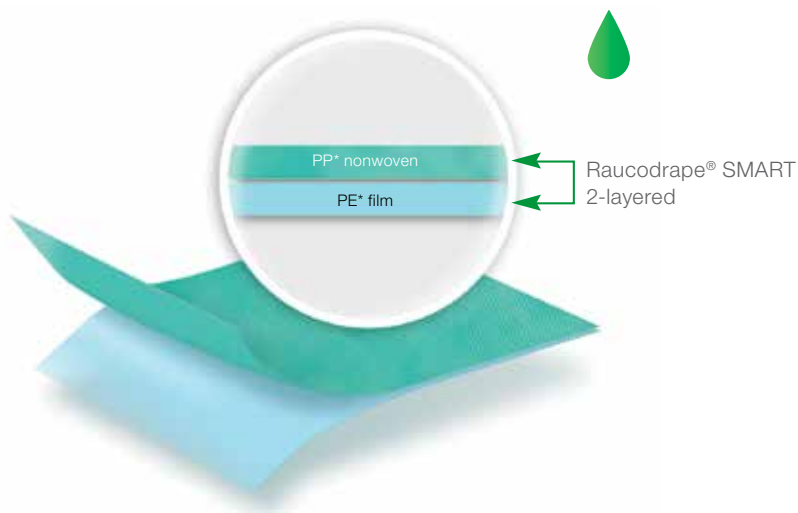

Raucodrape SMART OR Drape 2-layered Plus
- for procedures with moderate to high amounts of fluid
- safe barrier effect against penetration by fluids and bacteria
- very good absorbency and rate of absorption
- high tensile strength
- very low linting

Raucodrape® SMART 2-layered Plus

PP* nonwoven

Raucodrape®
Strong solutions to the last detail

With Raucodrape®, unfolding is faster and easier
Raucodrape OR drapes are folded in a user-friendly manner. Each type of drape is folded in a particular way depending on its use to ensure that it can be used safely and is easier and quicker to unfold. On all self-adhesive fenestrated drapes, the fenestration is visible even before the drape is unfolded. This makes its correct application on patients much easier.

Clear pictograms
The readily understandable pictograms also ensure that the drapes can be unfolded safely and rapidly. They show at a glance, for example, the direction in which they should be unfolded, how to start unfolding them, how they should be positioned on patients, any slits, integrated leggings and more besides.

Three-piece adhesive strips
All split sheets have an ergonomically designed, three-piece adhesive strip for even easier application. Many adhesive drapes have a longer adhesive strip for adipose patients.
All adhesive strips are equipped with a 2-cm-long finger-lift for a quicker and safer grip.

1 anaesthesia drape with armrest cover and cut, which prevents undesirable tension

2 reinforcement around the operating field

3 extra long leg drape
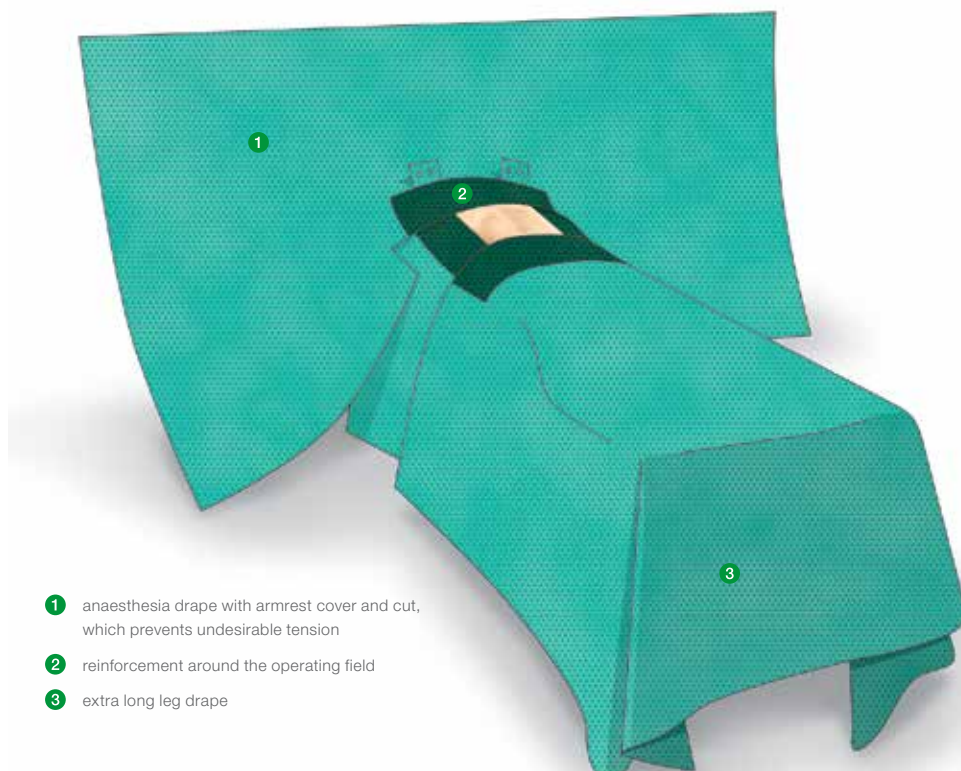

Raucodrape®
Pictograms

Indicates the positioning of the drape (cranially/caudally)
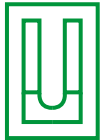

Indicates the direction of the slit
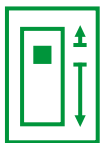

Indicates the off-centre fenestration

Indicates the position of the fluid collection pouch

Indicates the positioning of the integrated leggings (in the lithotomy position)

Indicates the centre of the adhesive drape (visible after first first fold is opened out)

Indicates the positioning of the hands when applying the under buttocks drape and turban drape

Indicates the direction in which to unfold the leg protectors
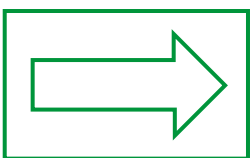

Indicates the direction in which to unfold all-in-one drapes
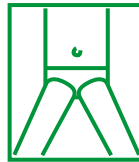

Indicates the perineal draping of the bilateral split sheet

Indicates the body and leg drape

Indicates the standard anaethesia drape

Indicates the anaesthesia drape with armrest cover

Indicates the anaesthesia drape of the split sheet set
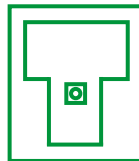

Indicates the positioning of the hand surgery drape
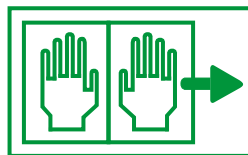

Indicates first unfolding step when opening up a set. Indicates the positioning of the hands when applying the instrument table cover

Raucodrape®
A sophisticated packaging concept for greater transparency and safety

Solid protection and reliable handling
A sophisticated modular packaging system ensures the requisite safety – during transport and storage and right up until it is used in the OR. The functional packaging with universally uniform and clear labelling of contents and EAN 128 barcodes for all packaging levels simplifies logistics control and safe handling of the products.

Heavy-duty transport and storage cartons
The transport and storage cartons made from recyclable materials reliably protect against damage.

Practical dispenser packaging
All individual products in the PRO range are packaged in a reclosable folding box with a dispenser opening. They ensure efficient storage and fast access to the sterile, individually packed products. Raucodrape sets are packaged in PE bags.

Peelable packaging in all formats
Raucodrape OR drapes are packaged in user-friendly peel pouches. They can be opened with a single action and simplify the fast and safe removal of sterile products.

All the important information at a single glance
The labelling of all products is clear and unambiguous. For both the visual depiction and textual description of the contents and the provision of all other required information, the same is always true: All information is legible and easy to understand.

Two identical documentation labels
Each peel pouch comes with a double set of self-adhesive documentation labels for fast and reliable documentation on OR reports.
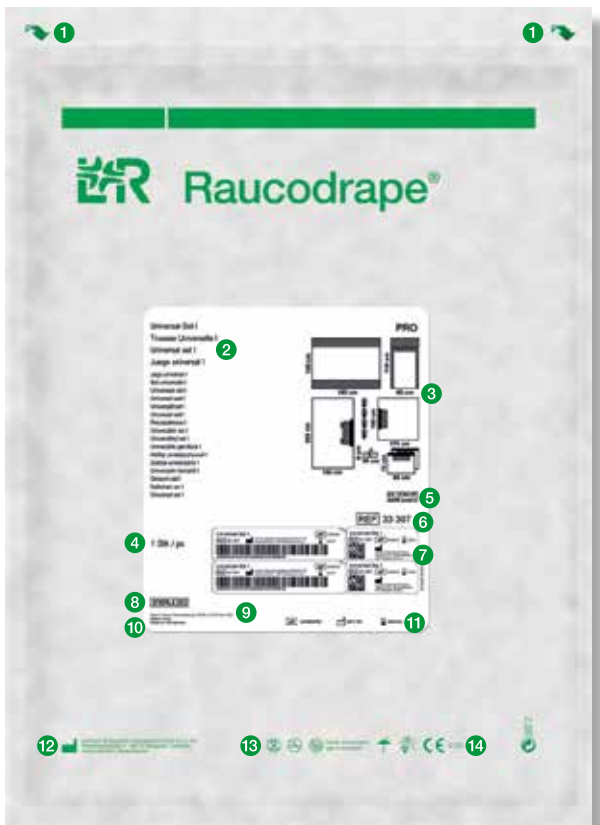

1. indication of the direction in which to peel open
2. product name in different languages
3. pictogram, product dimensions
4. quantity
5. EN 13795 marking / AAMI Level 4 marking
6. item number
7. self-adhesive documentation labels with EAN 128 barcode and data matrix code
8. "STERILE" symbol, incl. sterilisation method
9. indication of flammability class
10. "Made in" statement
11. lot number, date of manufacture, expiry date
12. manufacturer
13. safety symbols
14. CE marking

Raucodrape OR Drape System
Colour key
Materials and product details

The following pages show drawings of our OR drape sheets. Different colours and symbols represent the materials used and indicate special features of the respective OR drape.

In each case, the drawings show the view of the side away from the patient. To provide more complete information, the adhesive strips on the patient side are shown as red lines. This will give you a good overview of materials used and the special features of each drape.

OR Clothing
Scrub suits, surgical gowns, surgical face masks, surgical caps and gloves

Sentinex® Scrub Suits –
single use, multiple benefits.

**There are good reasons to choose
Sentinex® Scrub suits**

- quality of the materials is always the same*
- hygiene – new scrubs daily
- comfort – comfortable to wear
- isolating thermojacket keeps the staff warm in the operating rooms
- breathable material, better heat exchange

Sentinex Soft scores with a divided breast pocket

A flexible drawstring waistband ensures a custom fit.

Elastic band in the lower back area of the thermojacket

* Both materials conform to the EN 13795 standard performance requirements for surgical gowns for less critical zones.

Warming collar to protect against cold draughts in the OR

At a glance –
individually combinable and a precise fit tailored to your needs.

Sentinex® PRO Surgical Gowns

**PRO – maximum protection for longer,
more complicated procedures**
- wide range of products
- generous design with very high user and wearing comfort
- exceed the EN 13795 requirements
- designed for
  - ◆ procedures such as operations with moderate
    to high amounts of fluid
  - ◆ and longer surgical procedures.

Two materials: Spunlace and polypropylene

Spunlace
- material with the look and feel of fabric
- outstanding wearing comfort
- skin-friendly and breathable
- also very well suited for physically
  demanding procedures

Polypropylene
- lighter
- reliably protect against bacteria and
  fluids in accordance with EN 13795
  and the AAMI standard
- ensures circulation of air,
  heat and water vapour

Sentinex® PRO Surgical Gowns

Four versions: Basic, Standard, Special and Special Plus

Basic	Standard	Special	Special Plus

Sentinex® PRO Surgical Gown Basic
Tie-back gown for minor procedures and treatments, with 3 ties on the back for reliable closure.

Sentinex® PRO Surgical Gown Standard
Wraparound surgical gown with sterile back section thanks to very generous overlap. Optimally suited for procedures with low amounts of fluid.

Sentinex® PRO Surgical Gown Special
Wraparound surgical gown based on the Standard version with additional fluid-impermeable reinforcements on the front and sleeve area. Very well suited for surgeries with high amounts of fluid.

Sentinex® PRO Surgical Gown Special Plus
Wraparound surgical gown based on the Special version, with the additional feature of a wider reinforcement for safe protection in situations with a lateral fluid burden.

Two packaging options: with sterile wrapping and "direct"

Sentinex® PRO Surgical gowns with sterile wrapping
- very well suited for sterile preparation
- with sterile wrapping
- 2 towels

Sentinex® PRO Surgical gowns "direct"
- for immediate sterile handover
- for rapid removal
- without sterile wrapping and towels

Sentinex® SMART Surgical Gowns

SMART – protection for shorter, less complicated procedures
- focused range of products
- functional design with high user and wearing comfort
- meet the requirements of EN 13795 and the AAMI standard
- designed for
  - ◆ procedures, e.g. operations, with low to medium amounts of fluid
  - ◆ short surgical procedures such as outpatient surgery

Choose the **Standard** or **Special** version depending on the length of the procedure and/or the amount of fluid.

Sentinex SMART Surgical Gown
Standard

Wraparound surgical gown with sterile back section thanks to very generous overlap. Optimally suited for procedures with low amounts of fluid.

The material for safety and a comfortable microclimate
- protection against bacteria and fluids in accordance with EN 13795 and the AAMI standard
- air-permeable
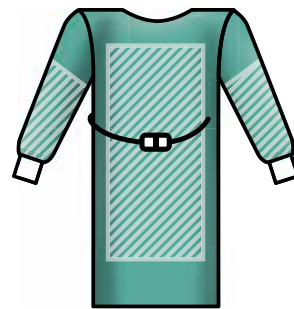

Sentinex SMART Surgical Gown
Special

Wraparound surgical gown based on the Standard version with additional fluid-impermeable reinforcements on the front and sleeve area. The reinforcement provides a high level of resistance to soaking and bacterial penetration. Very well suited for surgeries with medium to high amounts of fluid.

Polypropylene

Setpack® OR Dressing Materials

Setpack® OR Dressing Materials
Flexible combination of standardised components

The ready-for-use standard set contains laparotomy swabs, gauze swabs, gauze balls or dissecting swabs in appropriate quantities for clinical use.

Counting card system

- dual check system by having each counting card both inside the inner wrapping for sterile materials and in the peel pouch
- makes swab count easier before and after the operation
- no handover of counting cards during the surgical procedure
- clear documentation with self-adhesive counting cards

Inner wrapping for sterile materials

- for gauze swabs and laparotomy swabs
- user-friendly flap for easy-to-open packaging
- the product can be taken out quickly and safely

Sliding box for dissecting swabs

- greater safety thanks to optimal piece count check before and after the surgical procedure
- specially designed for the handy removal of the dissecting swabs

Setpack Toptex lite

X-ray detectable

Setpack
Gauze Balls,
X-ray detectable

Setpack
Dissecting Swabs,
X-ray detectable

Setpack® Toptex® lite Laparotomy Swabs, X-ray-detectable

Field of application
- designed for immediate use in the OR
- intended to be used inside the body, on a surgical incision to control bleeding and absorb fluid
- an X-ray detectable element helps to detect gossypiboma (device left inside the body)

Properties
- made from cotton gauze conform to EN 14079
- prewashed
- absorbent
- 20 threads
- packaged in inner wrapping for sterile materials for a fast and secure removal of the product and a swab count
- separately attached, double, self-adhesive counting cards

Product composition
100% cotton; X-ray detectable chip
(polyvinyl chloride and barium sulphate)

Versions

Setpack® OR Dressing Materials
Custom assembled according to your specifications

Setpack Individual offers flexible solutions for all regularly performed surgical procedures. In close cooperation with customers, L&R will analyse the initial situation, define individual requirements, and compile a user-oriented Setpack for your individual needs.

This service is always available for our customers, even if circumstances change. With a standardised packaging system, L&R provides professional expert production of Setpacks for specific customer needs.

The combination of Setpack Standard and Setpack Individual ensures economic use of materials and avoids excessive residual quantities.

Advantages

1. Customisable
- custom assembled in accordance with customer specifications
- individual needs assessment closely coordinated with the customer's specialist departments

2. Economical
- time savings thanks to standardisation of the process workflows
- economic use of materials
- no in-house reprocessing
- no in-house validated sterilisation process required

3. Safe
- repeated piece count checks during Setpack production

Kitpack® OR Custom Procedure Tray

Kitpack® OR Custom Procedure Trays

Kitpack is an efficient OR system comprising various ready-for-use OR components. In addition to including Raucodrape OR drapes, Sentinex Surgical gowns and OR Dressing materials, other components from reputable manufacturers can be integrated on request.

The Kitpack and all its components are compactly packed, sterile, and ready for immediate use.

Sets are custom assembled based on your requirements, depending on the surgical procedures specified.

By using prefabricated Kitpacks, you will reduce preparation times and procedure costs – with full safety and the necessary flexibility.

Raucodrape® OR Drapes
- particularly tear-resistant and absorbent
- safe barrier effect against penetration by fluids and bacteria
- good draping behaviour

Sentinex® Surgical Gowns
- reliable protection against bacteria and fluids
- very high wearing comfort
- skin-friendly and breathable

OR dressing materials
- with X-ray detectable thread or chip
- very absorbent
- with double, self-adhesive counting card
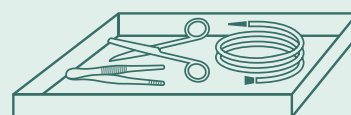

Other single-use surgical components
- such as tubes, suture materials, scalpels, gloves and syringes
- high-quality products
- well-known manufacturers

Added value: Kitpack®

- delivers substantial time savings as there is no need to assemble individual components prior to surgery
- reduces the time spent on logistics and administration because the more straightforward ordering process minimises the work involved in purchasing
- ensures greater safety in the OR because reducing the risk of contamination associated with opening and handover of sterile products improves infection prophylaxis
- makes it easier to document the materials used in the OR because all relevant information is provided on a single label
- increases cost transparency as the costs per case can be allocated faster and more easily than with individual components

Additional safety and time-savings thanks to the colour marking of your Kitpack
Your Kitpack can be provided with a colour marking matching that of your instrument basket. You can choose from 15 different colours and 3 positions where to place the colour points (size: 6 cm in diameter) on the peel pouch.

Kitpack®

Kitpack® start

Field of application
- Specifically designed for use in the OR

Properties
- immediately available
- no contract terms
- sterile and ready for immediate use
- saves time during surgery preparation and post-processing
- only one ordering step needed for purchasing
- reduces stock-keeping
- flexible during the trial period
- economically pre-assembled

Product composition
Kitpack start contains basic supplies and equipment with the most important ready-for-use single-use components for the specific type of surgery in question.

L&R OPTILINE®
Your very own hospital solution.

To ensure continued success in the growing health care market in the future, it is essential to already be well-prepared today. Increasing quality competition, cost and time pressure, a shortage of skilled workers and outpatient care – the challenges in routine clinical practice are many and varied.

We help you to standardise your processes, combine sophisticated patient care with essential economic efficiency, link the aims of administration with those of the users and optimise your outpatient units so that you have more time to care for your patients. Here is a selection of our solution methods that we use to make this possible for you.

In our work, we focus on three main topics:

⊕ Efficiency

You generate potential savings by optimising processes and products.

⊕ Expertise

You benefit from personal support from experienced specialists.

⊕ Partnership

You profit from a strategic partnership on an equal footing.

All-round support with L&R OPTILINE® – our modules and services at a glance:

L&R OPTILINE®

Customised services to optimise processes & products
Needs-based | Modular & Holistic | Cross-site | Together with all involved parties

| Ward | OR | Negative Pressure Therapy | Administration | Outpatient |

Consumption data analysis | Standardisation and process optimisation
Practical trial and standard specification | Implementation and user training | Long-term controlling

| Logistics | Digitisation & E-Business | Sustainability |

Personal support and consulting from experienced L&R specialists

Available services vary from one market/country to another. The cost of individual services depends on the type and scope of the service. Please arrange an appointment for a customised offer.

L&R OPTILINE®
For added value.

Your added value:

The potential to save money

Efficient use of resources

Increased efficiency

Quality assurance

Get to know L&R OPTILINE®
Arrange an individual consultation and together, we will find out how you can benefit from the first-class quality of our services and products.
